

## **Latest X-Way and Euro6 ACCO models now available**

Prior to distributing our last edition of *IVECO Torque*, we were gearing up for the 'TMC Trailers Trucking Industry Show' and planned to use this event to launch our new Euro6 X-Way and Euro6 ACCO models in New Zealand.

As you all know, due to COVID-19 the show was unable to go ahead. The good news though is that both of these exciting new models are now available to purchase in New Zealand, and in fact, some units have already been sold and are making a strong contribution in their new fleets.

A common theme across both these model ranges are cleaner and more efficient Euro6 engines, market-leading active and passive safety features, clever transmission options and the usual benefits you associate with IVECO such as low total cost of ownership and driver comfort features.

To learn more about the new X-Way and ACCO models, please visit our website and take a look at the latest brochures and specification sheets.
